

Coding in Magento Since 2008

Polcode is a full-service
Magento development
partner at our core.

From the very first version released, we were one of three companies in Poland to code eCommerce solutions on the Magento platform. Today, our business has a whole lineup of accomplished Magento veterans, who are able to deliver full-service eCommerce results.

We have worked with dozens of founders to kickstart their online stores, and delivered even more projects that rapidly grow global eCommerce brands. From local retailers to influential global eCommerce companies, we can transform the potential of any Magento-powered store.

Team Extension

As your reliable tech partner, Polcode augments your existing team with quick and remote hires dedicated to your business. Fill in specialized developer skills while avoiding costly in-house hiring processes.

Polcode is home to **over 20 mid-to-senior level Magento Devs** on board who have built Magento projects for years, and continuously pass our demanding and tough screening processes.

Our developers offer something uniquely trustworthy compared to other agencies:

- **Mid-to-senior Magento Certified Developers** with expert code architecture knowledge
- **Full-stack, full-service teams** able to write clean, well-documented, efficient code with page load performance underlying every decision
- **A rigorous education** and knowledge sharing approach to keep up with changing tech
- **Familiarity with adjacent eCommerce tech** and best practices for implementation
- **Trained in soft-skills and adaptable** to your preferred workflows and tools

3-step Team Extension Process:

1

ANALYSIS

We get to know your business requirements and understand your expectations thoroughly.

2

CONTRACT & ONBOARDING

Sign our agreement and set the date for onboarding. During the onboarding conference call, you'll be introduced to your new team member(s) and begin assigning tasks.

3

DELIVERY MANAGEMENT

You'll be in touch with a delivery manager who will be a single point of contact for all process and business-related interactions.

Full Cycle Product Development

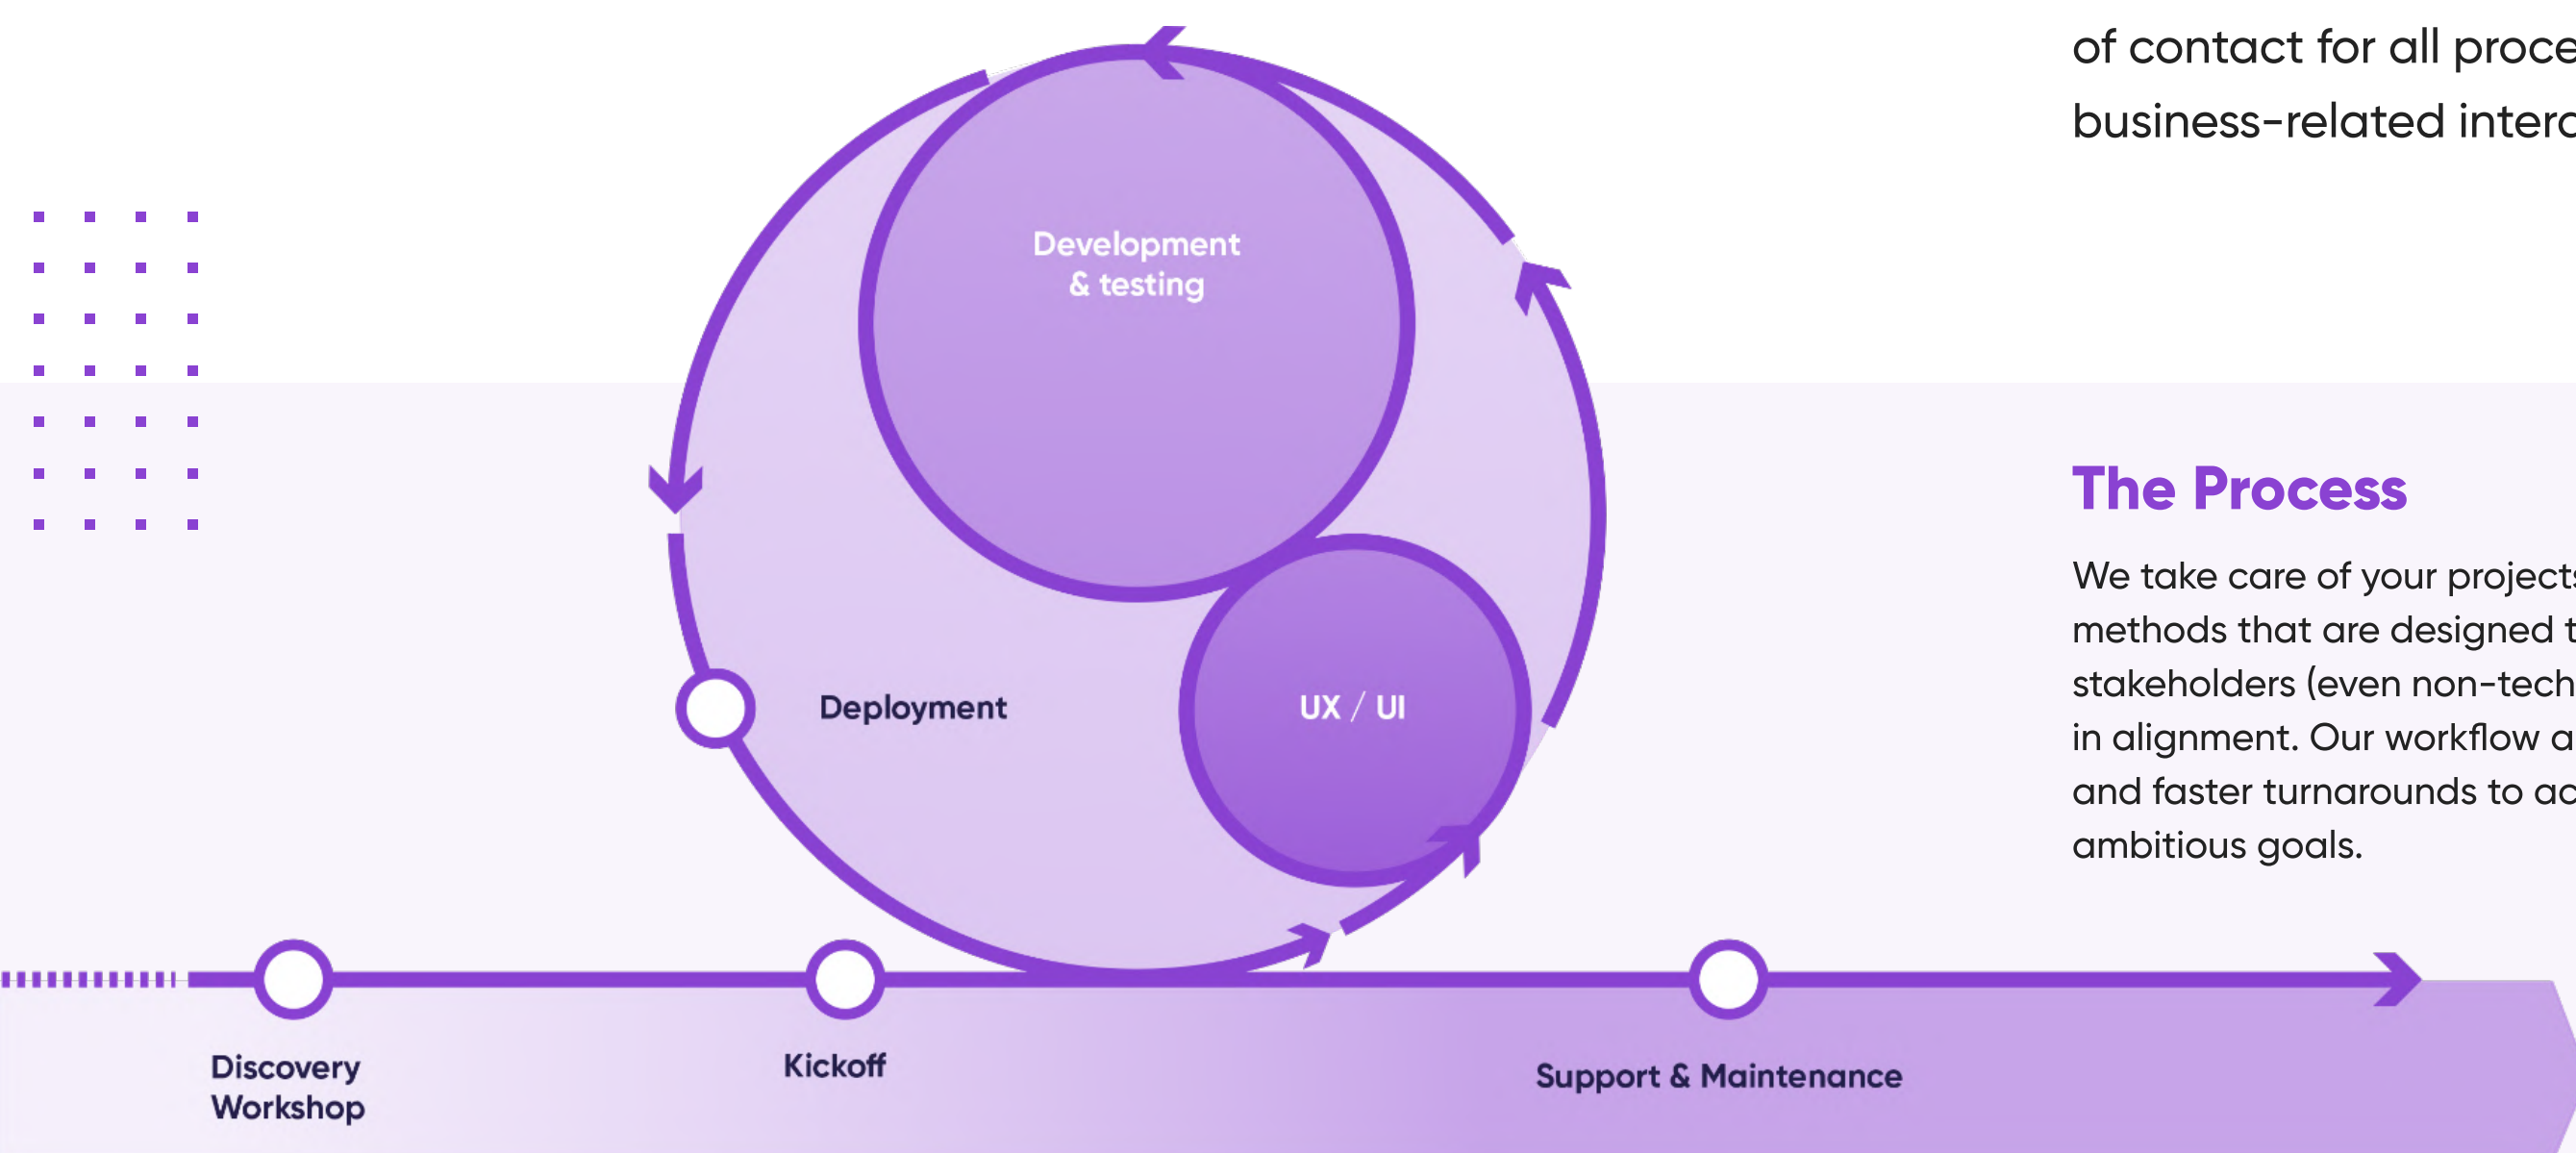

We take care of your project from A to Z by leading your entire design & development process.

Carefully chosen professionals drive amazing results by working together:

- Project Managers
- Product Owners
- UX/UI Designers
- Graphic Designers
- Backend Developers
- Frontend Developers
- DevOps Engineers
- QA Specialists
- Solutions Architects

Dedicated Delivery Manager

You'll be in touch with a delivery manager who will be a single point of contact for all process and business-related interactions.

The Process

We take care of your projects with proven agile methods that are designed to get all stakeholders (even non-technical ones) in alignment. Our workflow amplifies collaboration and faster turnarounds to achieve even the most ambitious goals.

Audit Your Code and UX/UI

Our **Magento audit** scrutinizes your current setup across technical elements (code and architecture) through functional components (UX and UI).

We identify points of interest, possible opportunities, and spot gaps or risks that could lead to problems.

Our Types of Magento Development

Magento audit of existing online store

Magento custom development
new online storefront built from scratch

Magento custom development
adding and building entirely new features

Migration from M1 to M2
upgrade to **Magento 2**

Migration to M2 from any eCommerce platform

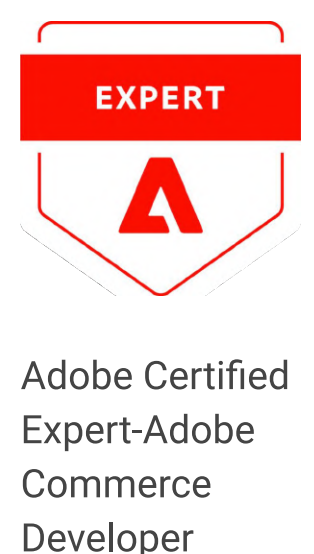

Magento technical support and maintenance

software for both leading and
emerging brands

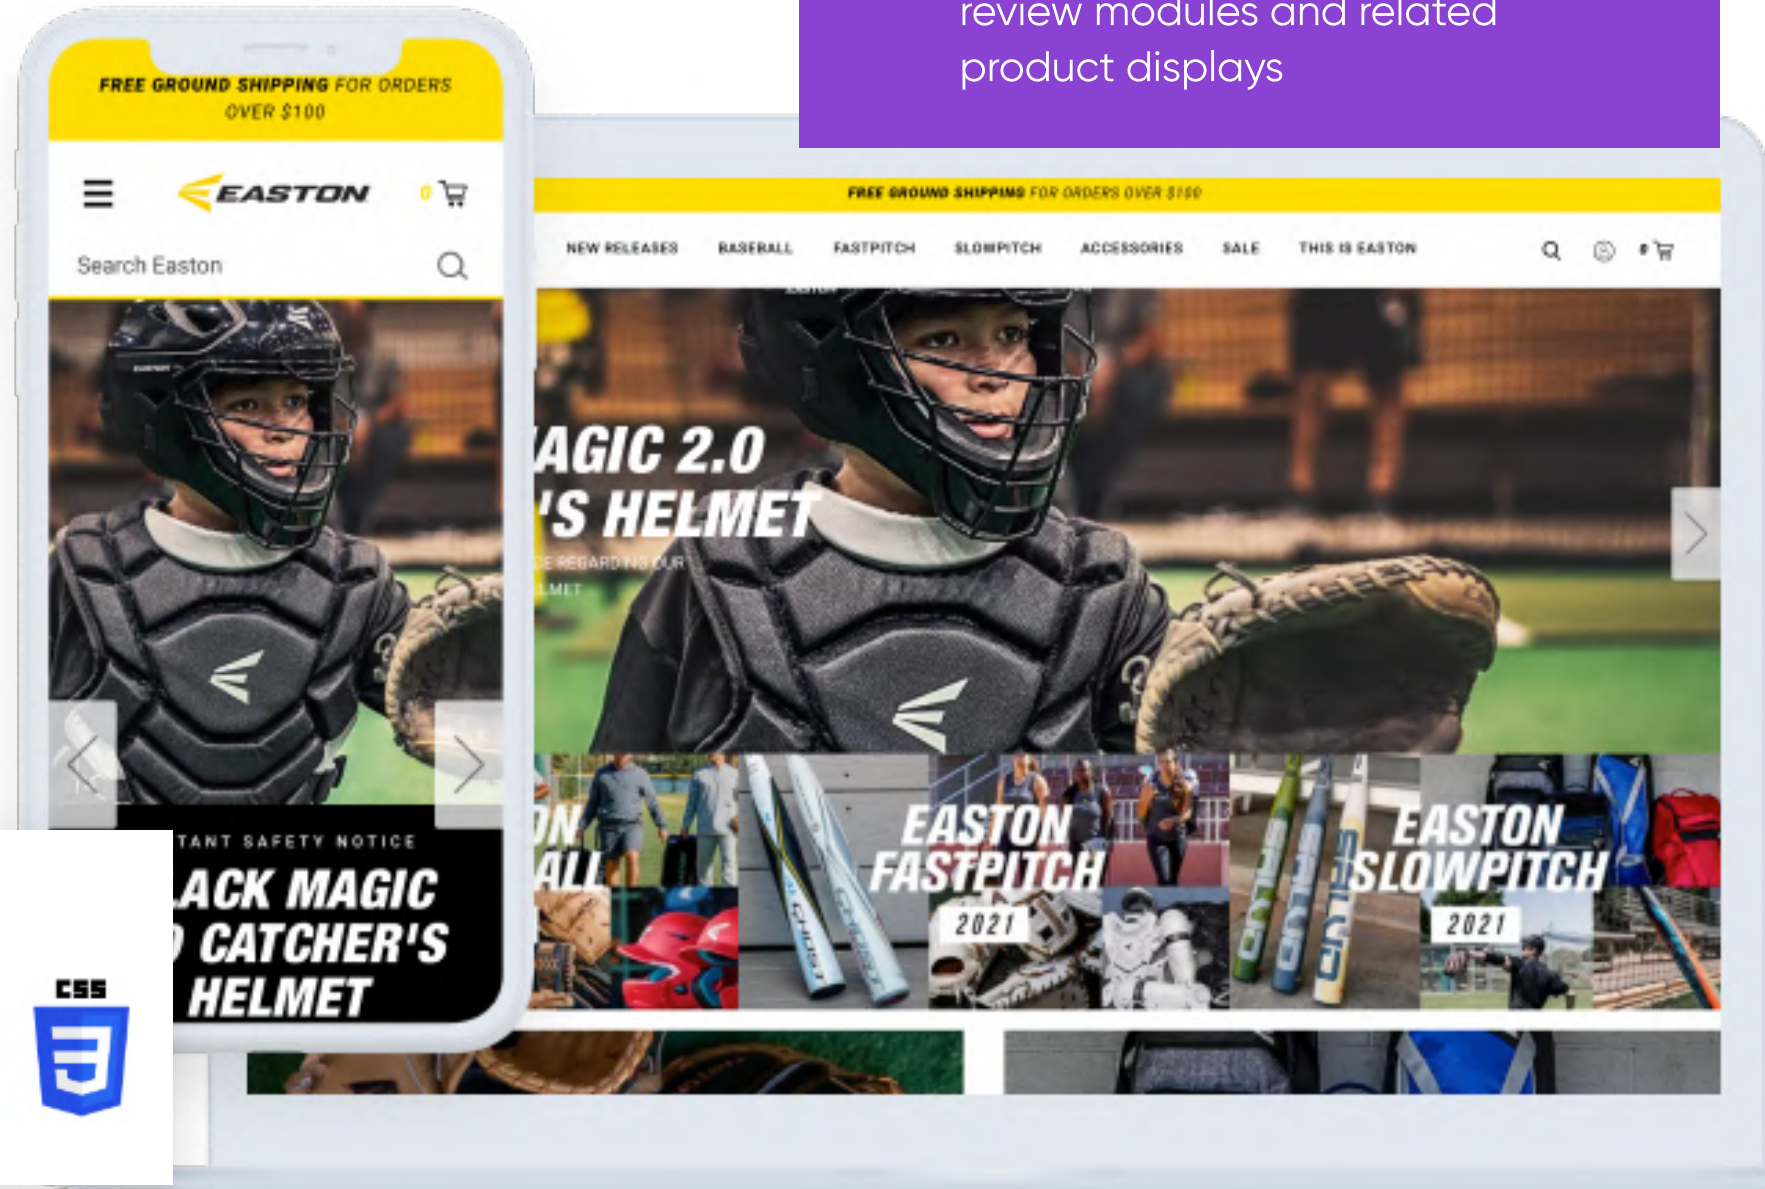

Easton eCommerce shops and customized websites

Polcode delivered large-scale eCommerce storefront, backend and frontend development with multiple integrations and module development.

Easton owns multiple leading sports equipment stores, selling high volumes internationally.

KEY DELIVERABLES:

- ✓ Fully customized and responsive webstore
- ✓ User-friendly admin panel
- ✓ YouTube integrations, customer review modules and related product displays

TECHNOLOGIES:

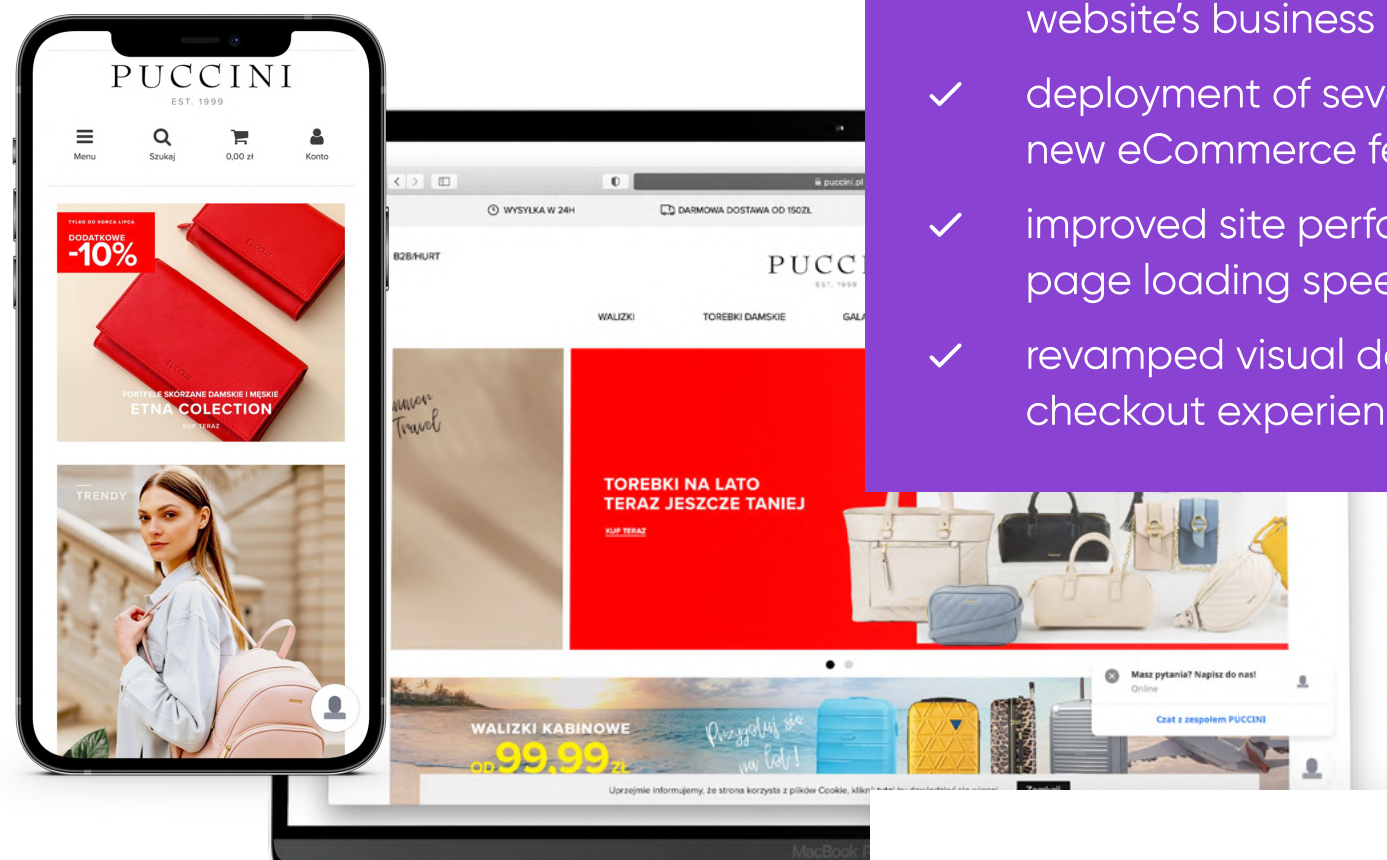

PUCCINI

Bespoke Polish manufacturing brand Puccini.pl renews online trust with Polcode's eCommerce development.

In recent years, Polcode has served as Puccini's professional developer team, transforming their online presence with modern technologies that enable intuitive global ordering systems and increased sales & conversions—all within a visually appealing shopping interface.

KEY DELIVERABLES:

- ✓ update of the the eCommerce website's business logic
- ✓ deployment of several completely new eCommerce features
- ✓ improved site performance and page loading speed
- ✓ revamped visual design and better checkout experience

TECHNOLOGIES:

3rd-party Logistics & Delivery Integrations with:

It was not a coincidence that we chose Polcode as our technology partner. We were looking for a reliable, timely and trusted eCommerce development firm who would take over the maintenance and development of our online store. **Their reputation among our friends from the IT industry led us to work with them. We rank Polcode's work very highly, and ultimately chose to continue working with them over the last three years.**

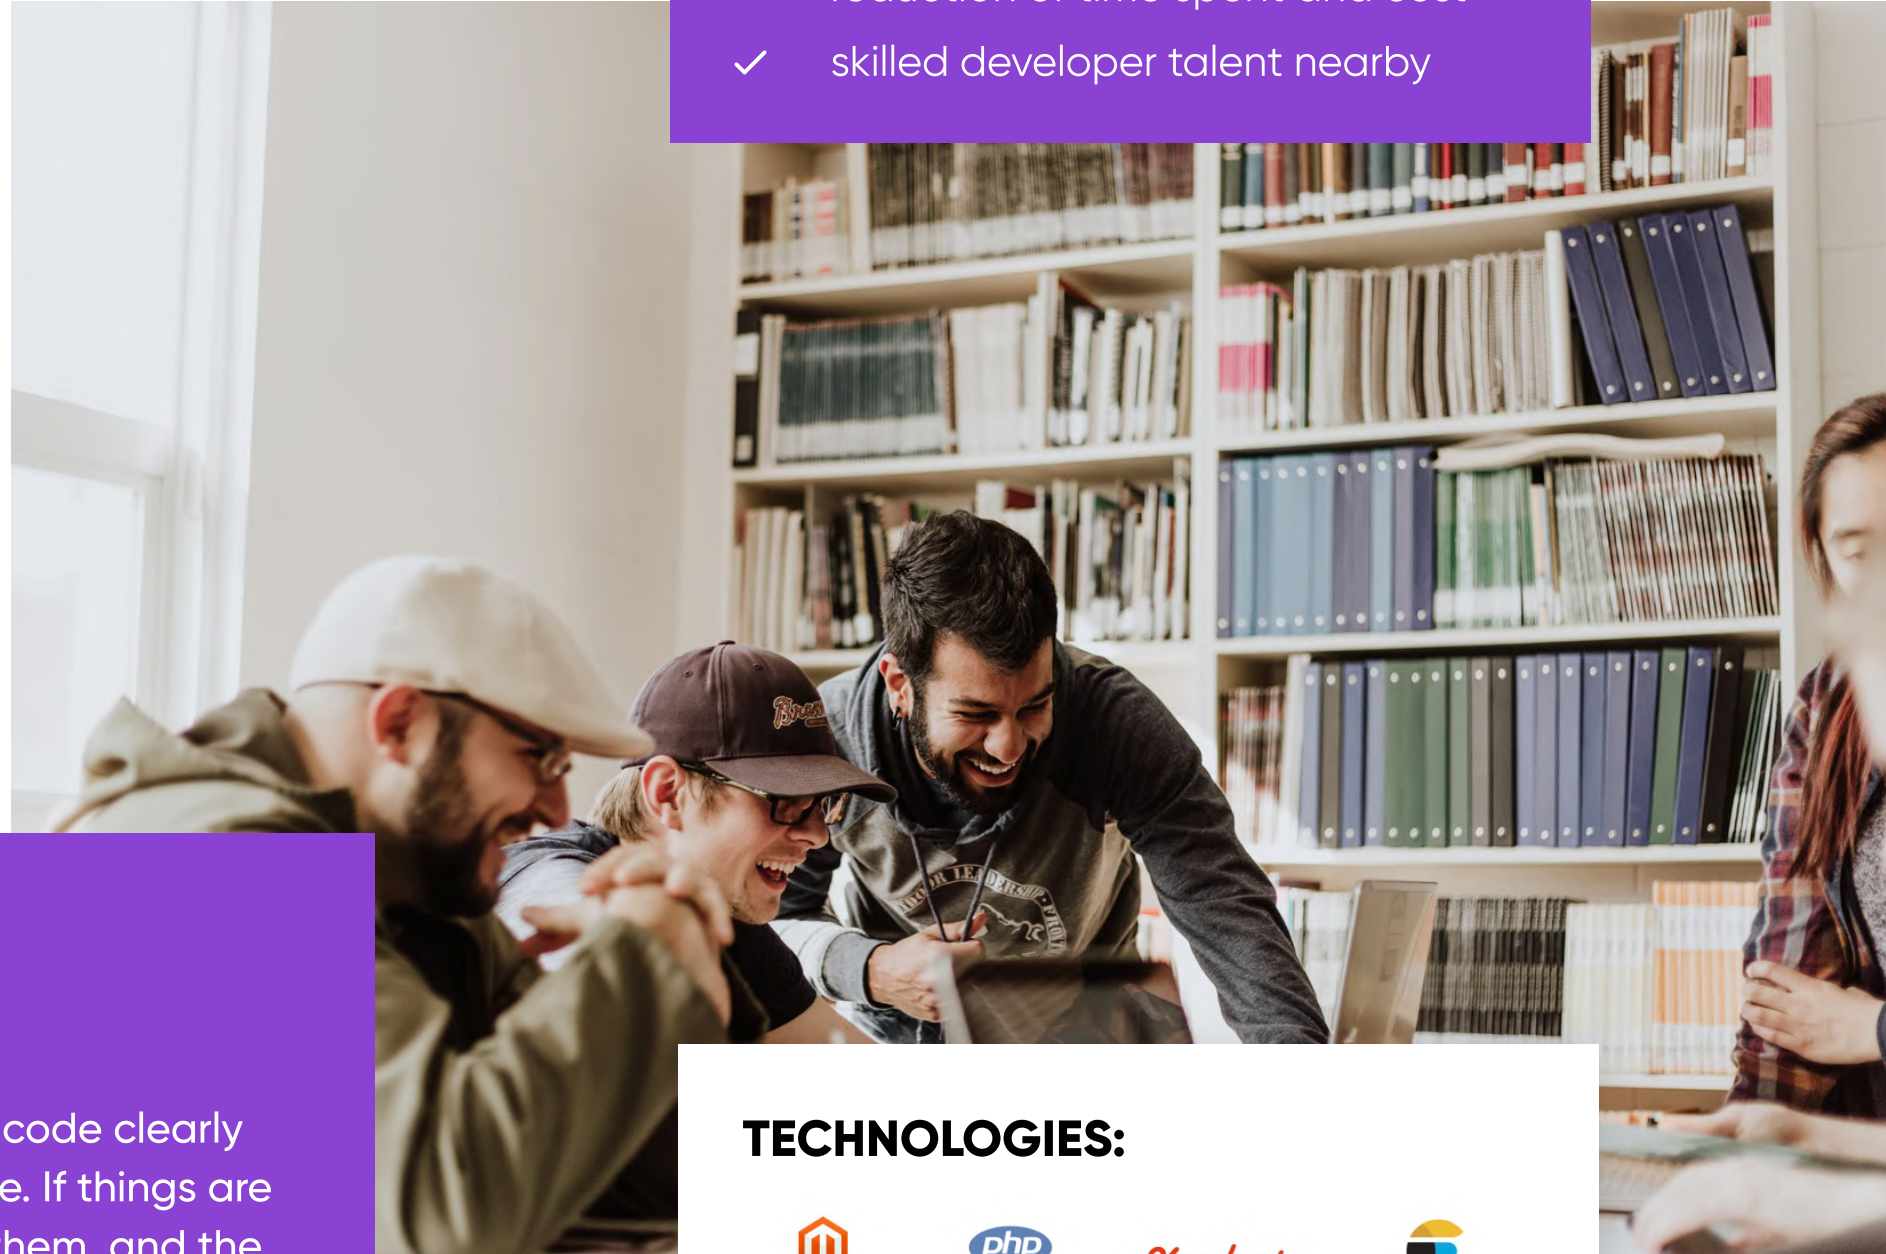

Jacek Przybył, IT Development Expert at Puccini

German-based digital marketing agency

Polcode offers total developer control and transparency to German-based digital marketing agency

A small-yet-effective digital agency based in Germany leveraged Polcode's remote developers to provide IT services, web development and marketing consulting products to their B2C and B2B clients in DACH regions. They develop bespoke software products in-house, which helps small to medium-sized companies grow their digital business, and hiring nearshore developers helps them increase lead times and beat talent shortages in the local market.

KEY DELIVERABLES:

- ✓ migration from Magento 1 to Magento 2
- ✓ new core features introduced to the eCommerce platform
- ✓ productivity and timeliness
- ✓ reduction of time spent and cost
- ✓ skilled developer talent nearby

When we encounter challenging software issues, Polcode clearly points them out, applies fixes, and the matter is done. If things are not clear, Polcode asks good questions, we answer them, and the issue gets resolved. **Polcoders seem to have fun doing their job. It makes it fun to work together, and that's our aim.**

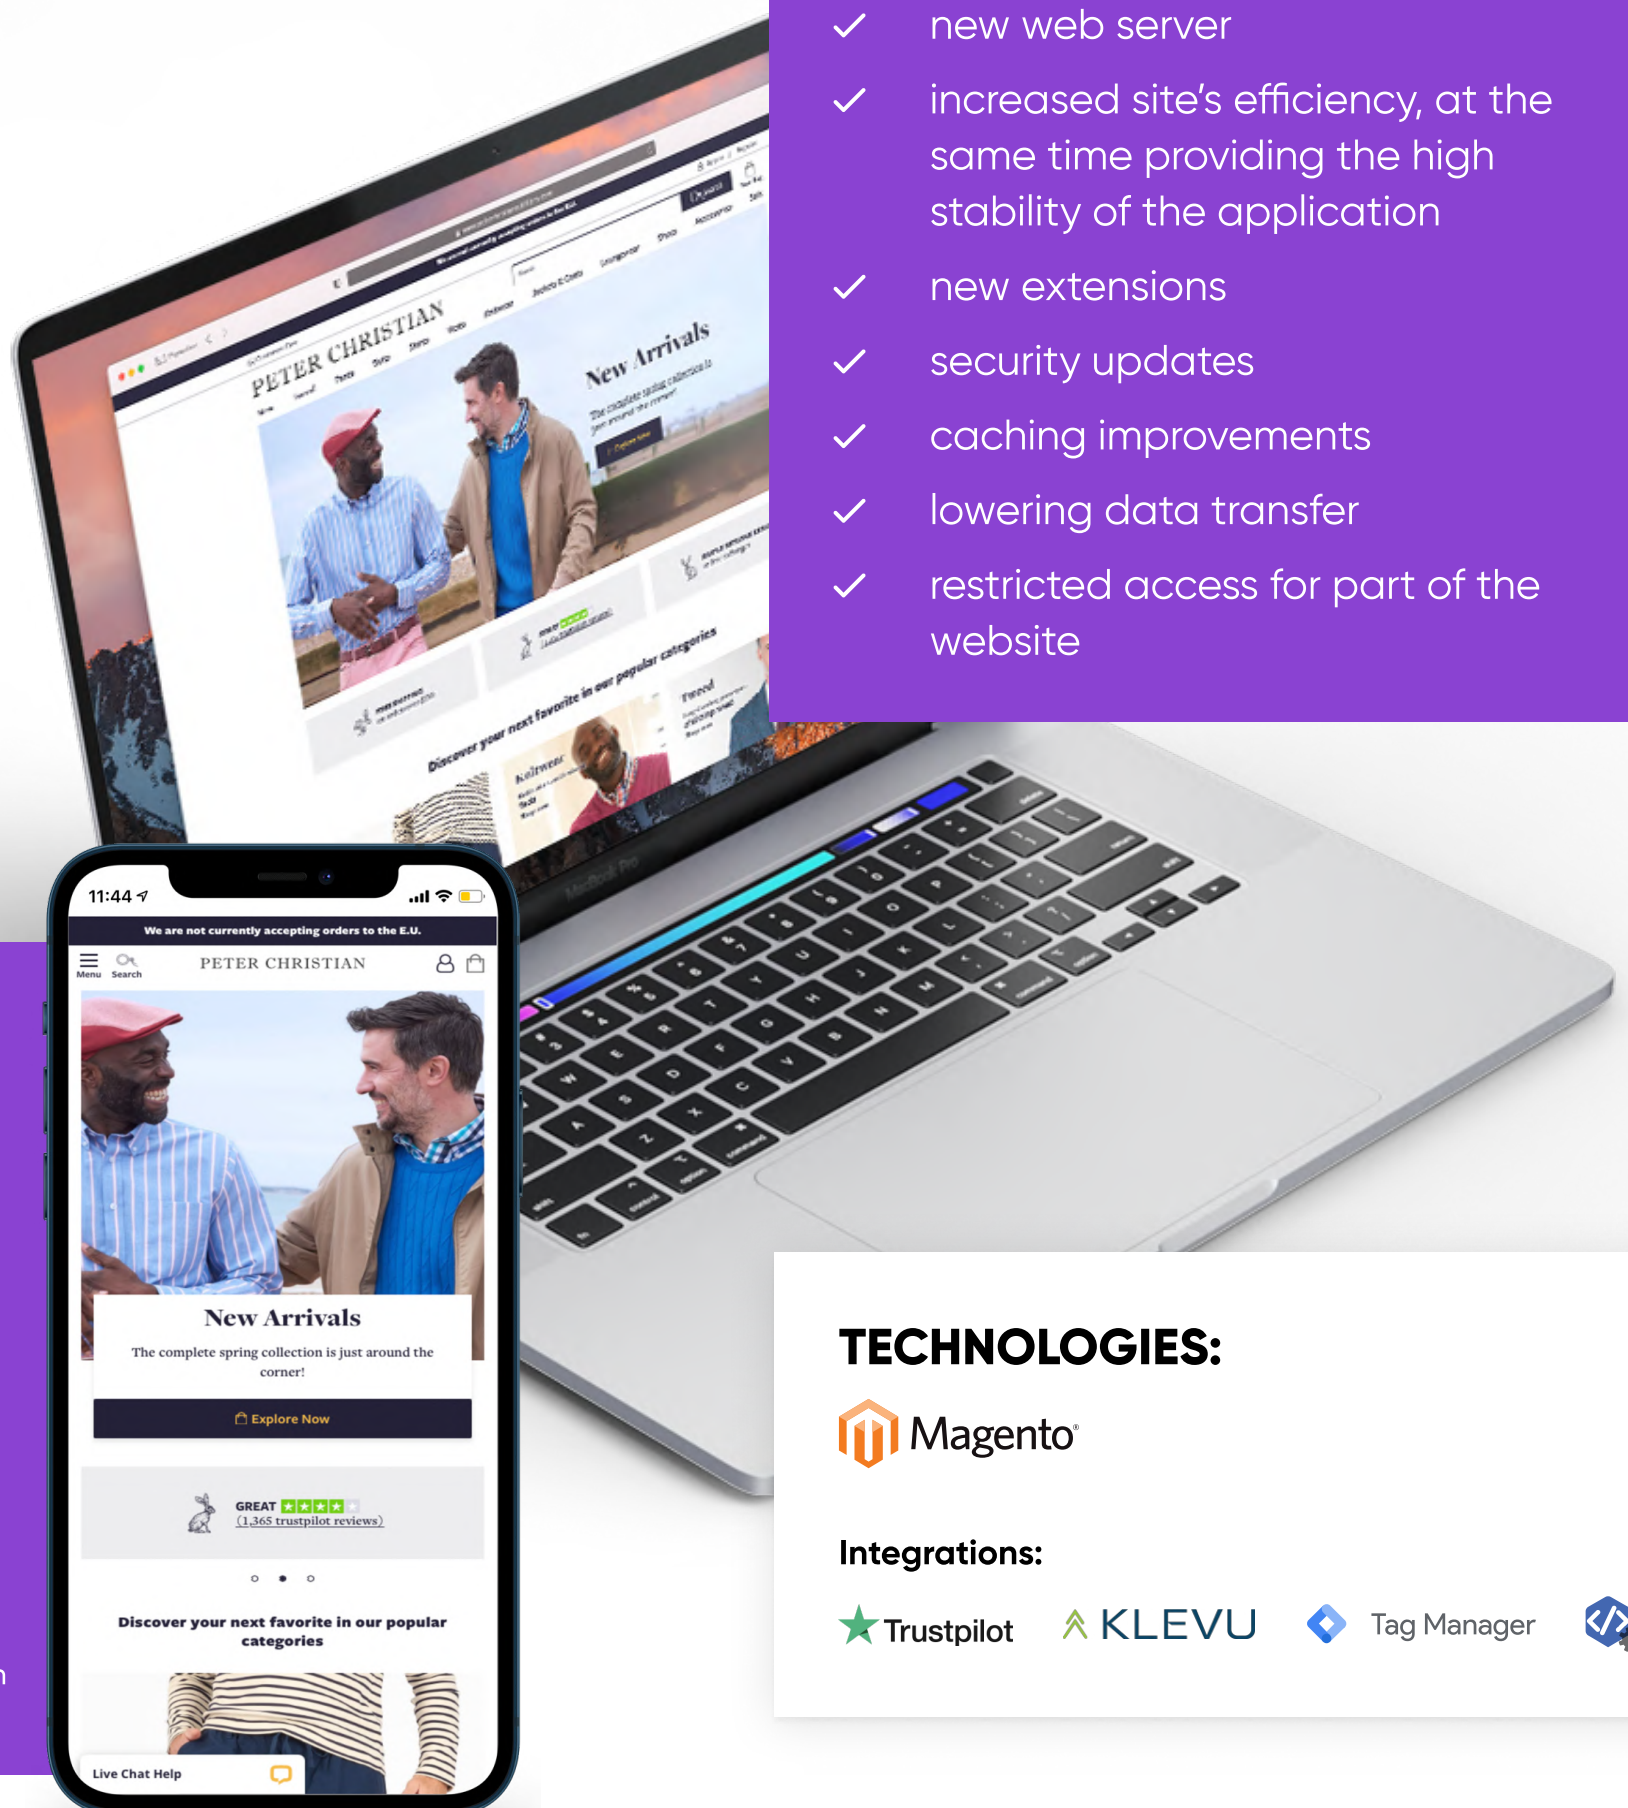

Martin, CEO of German-based Digital Marketing Agency

TECHNOLOGIES:

PETER CHRISTIAN

Peter Christian is a men's clothing store. Polcode developed an eCommerce platform using Magento 1 and is supporting the client's store (transition into a supportive role until future developments are required). Store runs in two versions: one dedicated to the United States and one for the United Kingdom.

KEY DELIVERABLES:

- ✓ new web server
- ✓ increased site's efficiency, at the same time providing the high stability of the application
- ✓ new extensions
- ✓ security updates
- ✓ caching improvements
- ✓ lowering data transfer
- ✓ restricted access for part of the website

It's hard to find strong Magento developers as a smaller company, so Polcode's skill set has been valuable to us. We were worried about a possible language barrier, but their English is excellent. **Their team is quick to solve any issues we express— they've been a reliable partner.**

David Boyce, IT Director at Peter Christian
